Subject index

Ad-atoms,
catalysis by ———. Part II. Enhancement of CO oxidation on Pt catalysts modified by Sn ad-atoms in the gaseous phase (Shibata, Furuya) 217
para-Aminodiphenylamine,
electropolymerisation reaction mechanism of ——— (Geniès et al.) 63
Anion coordination,
influence of ——— on potentials for oxidation of the porphyrin ring in tetraphenylporphinatozinc (Hinman, Pavelich) 53
Anodic stabilization,
——— and decomposition mechanisms in semiconductor (photo)-electrochemistry (Gomes et al.) 237
Aspartic acid,
equilibrium and kinetic properties of the complexation reactions of copper(II) with ——— (Foresti, Nyholm) 41

Bismuth,
electrochemical behaviour of irreversibly adsorbed ——— on Pt (100) with different degrees of crystalline surface order (Clavilier et al.) 175

Cadmium selenide,
on the kinetics of charge transfer between an illuminated ——— electrode and polysulphide electrolyte (Allongue et al.) 295
Photoelectrochemical oxidation of water at CdS and ——— anodes coated with composites of conducting polymer containing RuO_2 (Gningue et al.) 337
Cadmium selenide telluride,
Semiconducting ——— thin films prepared by electrodeposition (Loizos et al.) 399
Cadmium sulphide,
photoelectrochemical oxidation of water at ——— and CdSe anodes coated with composites of conducting polymer containing RuO_2 (Gningue et al.) 337
Cadmium telluride,
behaviour of ——— in aqueous solutions under reductive conditions. Part 1. Impedance studies under conditions of weak cathodic decomposition (Lincot, Vedel) 305
Behaviour of ——— in aqueous solutions under reductive conditions. Part 2. Ellipsometric studies of the cathodic decomposition (Gagnaire et al.) 323
Calorimetry,
$H_2 + O_2$ recombination in non-isothermal, non-adiabatic electrochemical ——— of water electrolysis in an undivided cell (Cunnane et al.) 163
Carbon dioxide,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of ———: p-GaP or p-GaAs/$Ni(cyclam)^{2+}$, aqueous medium (Petit et al.) 267
Carbon monoxide,
catalysis by ad-atoms. Part II. Enhancement of ——— oxidation on Pt catalysts modified by Sn ad-atoms in the gaseous phase (Shibata, Furuya) 217
Carbonyl compounds,
product-selectivity control in electroorganic reactions by controlling mass-transfer rate: Cathodic reduction of ——— and nitrobenzene (Cheng, Nonaka) 223
Cathodic decomposition,
behaviour of cadmium telluride in aqueous solutions under reductive conditions. Part 1. Impedance studies under conditions of weak ——— (Lincot, Vedel) 305
Behaviour of cadmium telluride in aqueous solutions under reductive conditions. Part 2. Ellipsometric studies of the ——— (Gagnaire et al.) 323

Cerium,
charge-transfer kinetics at an indium phosphide semidconductor electrode. Hole injection process in the presence of the Ce^{4+}/Ce^{3+} couple (Etcheberry et al.) 351
Charge transfer,
—— kinetics at an indium phosphide semiconductor electrode. Hole injection process in the presence of the Ce^{4+}/Ce^{3+} couple (Etcheberry et al.) 351
On the kinetics of —— between an illuminated CdSe electrode and polysulphide electrolyte (Allongue et al.) 295
Cluster excess free energy,
determination of the nucleation work and the —— during electrochemical phase formation (Chierchie) 205
Complexation reactions,
equilibrium and kinetic properties of the —— of copper(II) with aspartic acid (Foresti, Nyholm) 41
Conducting polymer,
photoelectrochemical oxidation of water at CdS and CdSe anodes coated with composites of —— containing RuO_2 (Gningue et al.) 337
Copper,
equilibrium and kinetic properties of the complexation reactions of ——(II) with aspartic acid (Foresti, Nyholm) 41
Stepwise reduction of ——(II) at a platinum electrode in water + *N,N*-dimethylformamide mixtures (Małyszko, Scendo) 113
Copper–iodium selenide,
photoelectrochemistry of InSe. Surface modification by $CuISe_3 \cdot$ n-Se (Sedaries et al.) 283
Cyclam,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of CO_2: p-GaP or p-GaAs/Ni(——)$^{2+}$, aqueous medium (Petit et al.) 267

Decomposition,
anodic stabilization and —— mechanisms in semiconductor (photo)-electrochemistry (Gomes et al.) 237
Dewar cells,
$H_2 + O_2$ recombination in non-isothermal, non-adiabatic electrochemical calorimetry of water electrolysis in an undivided cell (Cunnane et al.) 163
Digital simulation,
new explicit finite difference methods in the —— of electrochemical problems (Marques da Silva et al.) 1
N,N-Dimethylformamide,
stepwise reduction of Cu(II) at a platinum electrode in water + —— mixtures (Małyszko, Scendo) 113
Discontinuous metal films,
semiconductor electrodes modified by electrodeposition of ——. Part I. Role of the film morphology (Allongue, Souteyrand) 361

Ellipsometry,
behaviour of cadmium telluride in aqueous solutions under reductive conditions. Part 2. Ellipsometric studies of the cathodic decomposition (Gagnaire et al.) 323

Fast-scan cyclic voltammetry,
microdisk electrodes. Part II. —— with very small electrodes (Wipf et al.) 15
Ferri/ferrocyanide,
electron transport dynamics in partially quaternized poly(4-vinylpyridine) thin films containing —— (Oh, Faulkner) 77
Film morphology,
semiconductor electrodes modified by electrodeposition of discontinuous metal films. Part I. Role of the —— (Allongue, Souteyrand) 361
Finite difference methods,
new explicit —— in the digital simulation of electrochemical problems (Marques da Silva et al.) 1

Gallium arsenide,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of CO_2: p-GaP or p-——/Ni(cyclam)$^{2+}$, aqueous medium (Petit et al.) 267
Gallium phosphide,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of CO_2: p-—— or p-GaAs/Ni(cyclam)$^{2+}$, aqueous medium (Petit et al.) 267

Heavy metal,
catalytic effect of —— ions on the SnO_2/aqueous polyiodide interface and its application to photoelectrochemical cells (Tenne et al.) 389

Hexacyanoferrates,
solid-state electrochemistry: voltammetric monitoring of ionic conductivities in mixed-metal ——— (Kulesza, Galus) 455
Hole injection,
charge-transfer kinetics at an indium phosphide semiconductor electrode. ——— process in the presence of the Ce^{4+}/Ce^{3+} couple (Etcheberry et al.) 351
Hydrogen,
comparative voltammetric behaviour of ——— and O-atoms on a Pt electrode in sulphuric acid solutions within the 293 K to 233 K range (Florit et al.) 209
Hydrogen evolution reaction,
surface modifications with heteropoly and isopoly oxometalates. Influence of metal additions (Keita, Nadjo) 447

Impedance measurements,
behaviour of cadmium telluride in aqueous solutions under reductive conditions. Part 1. Impedance studies under conditions of weak cathodic decomposition (Lincot, Vedel) 305
Indium phosphide,
charge-transfer kinetics at an ——— semiconductor electrode. Hole injection process in the presence of the Ce^{4+}/Ce^{3+} couple (Etcheberry et al.) 351
Indium selenide,
photoelectrochemistry of ———. Surface modification by $CuISe_3$ · n-Se (Sedaries et al.) 283
Infrared spectroscopy,
in-situ infrared vibrational study of the early stages of silicon oxidation at the interface with a non-aqueous electrolyte (Ozanam, Chazalviel) 251
Iridium,
electrochemical behaviour of transparent heavily doped SnO_2 electrodes. Effect of radiolytic grafting of ——— nanoaggregates (Bruneaux et al.) 375

Laminar flow cell,
(photo)electrochemical ——— with two reference electrodes (Amiry et al.) 423

Mass-transfer rate,
product-selectivity control in electroorganic reactions by controlling ———: Cathodic reduction of carbonyl compounds and nitrobenzene (Cheng, Nonaka) 223
Metal films,
semiconductor electrodes modified by electrodeposition of discontinuous ———. Part I. Role of the film morphology (Allongue, Souteyrand) 361
6-Methyladenine,
influence of the molecular association of ——— on its electrochemical reduction (Rodríguez-Monge et al.) 129
Microdisk electrodes,
———. Part II. Fast-scan cyclic voltammetry with very small electrodes (Wipf et al.) 15
Molecular association,
influence of the ——— of 6-methyladenine on its electrochemical reduction (Rodríguez-Monge et al.) 129
Molecular catalysts,
——— in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of CO_2: p-GaP or p-GaAs/$Ni(cyclam)^{2+}$, aqueous medium (Petit et al.) 267
Molybdenum naphthalocyanines,
investigation of O_2 reduction in alkaline medium on supported ———. Effect of the support and of the isomer configuration (Coowar et al.) 143

Nickel complex,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective photoelectroreduction of CO_2: p-GaP or p-GaAs/$Ni(cyclam)^{2+}$, aqueous medium (Petit et al.) 267
Nitric acid,
electrocatalytic reduction of ——— at polyaniline filmed electrodes (Mengoli, Musiani) 99
Nitrobenzene,
product-selectivity control in electroorganic reactions by controlling mass-transfer rate: Cathodic reduction of carbonyl compounds and ——— (Cheng, Nonaka) 223
Non-aqueous electrolyte,
in-situ infrared vibrational study of the early stages of silicon oxidation at the interface with a ——— (Ozanam, Chazalviel) 251
Nucleation work,
determination of the ——— and the cluster excess free energy during electrochemical phase formation (Chierchie) 205

Open-circuit potentials,
——— of ZrO_2 electrodes (Ardizzone, Radaelli) 461
Oxide films,
protection of photoanodes against photocorrosion by surface deposition of ———: criteria for choosing the protective coating (Campet et al.) 435
Oxometalates,
surface modifications with heteropoly and isopoly ———. Influence of metal additions (Keita, Nadjo) 447
Oxygen,
comparative voltammetric behaviour of H- and ———-atoms on a Pt electrode in sulphuric acid solutions within the 293 K to 233 K range (Florit et al.) 209
Investigation of ——— reduction in alkaline media on supported Mo naphthalocyanines. Effect of the support and of the isomer configuration (Coowar et al.) 143

Phase formation,
determination of the nucleation work and the cluster excess free energy during electrochemical ——— (Chierchie) 205
Photoanodes,
protection of ——— against photocorrosion by surface deposition of oxide films: criteria for choosing the protective coating (Campet et al.) 435
Photocorrosion,
protection of photoanodes against ——— by surface deposition of oxide films: criteria for choosing the protective coating (Campet et al.) 435
Photoelectrochemical cells,
catalytic effect of heavy metal ions on the SnO_2/aqueous polyiodide interface and its application to ——— (Tenne et al.) 389
Molecular catalysts in ———. Study of an efficient system for the selective photoelectroreduction of CO_2: p-GaP or p-GaAs/$Ni(cyclam)^{2+}$, aqueous medium (Petit et al.) 267
(Photo)electrochemical laminar flow cell,
——— with two reference electrodes (Amiry et al.) 423
Photoelectrochemical oxidation,
——— of water at CdS and CdSe anodes coated with composites of conducting polymer containing RuO_2 (Gningue et al.) 337
(Photo)electrochemical studies,
critical analysis of electrical contacts to layered semiconductors for use in ——— (Etman, Neumann-Spallart) 411
(Photo)-electrochemistry,
anodic stabilization and decomposition mechanisms in semiconductor ——— (Gomes et al.) 237
——— of InSe. Surface modification by $CuIse_2$ · n-Se (Sedaries et al.) 283
Photoelectroreduction,
molecular catalysts in photoelectrochemical cells. Study of an efficient system for the selective ——— of CO_2: p-GaP or p-GaAs/$Ni(cyclam)^{2+}$, aqueous medium (Petit et al.) 267
Platinum,
catalysis by ad-atoms. Part II. Enhancement of CO oxidation on ——— catalysts modified by Sn ad-atoms in the gaseous phase (Shibata, Furuya) 217
Comparative voltammetric behaviour of H- and O-atoms on a ——— electrode in sulphuric acid solutions within the 293 K to 233 K range (Florit et al.) 209
Electrochemical behaviour of irreversibly adsorbed bismuth on ——— (100) with different degrees of crystalline surface order (Clavilier et al.) 175
Stepwise reduction of Cu(II) at a ——— electrode in water + *N*,*N*-dimethylformamide mixtures (Malyszko, Scendo) 113
Polyaniline,
electrocatalytic reduction of HNO_3 at ——— filmed electrodes (Mengoli, Musiani) 99
Polyiodide,
catalytic effect of heavy metal ions on the SnO_2/aqueous ——— interface and its application to photoelectrochemical cells (Tenne et al.) 389
Polysulphide,
on the kinetics of charge transfer between an illuminated CdSe electrode and ——— electrolyte (Allongue et al.) 295
Poly(4-vinylpyridine),
electron transport dynamics in partially quaternized ——— thin films containing ferri/ferrocyanide (Oh, Faulkner) 77
Porphyrin ring,
influence of anion coordination on potentials for oxidation of the ——— in tetraphenylporphinatozinc (Hinman, Pavelich) 53

Product-selectivity,
——— control in electroorganic reactions by controlling mass-transfer rate: Cathodic reduction of carbonyl compounds and nitrobenzene (Cheng, Nonaka) 223
Protective coating,
protection of photoanodes against photocorrosion by surface deposition of oxide films: criteria for choosing the ——— (Campet et al.) 435

Quasi-reversible waves,
potential step chronocoulometric procedure for the conversion of ——— waves into reversible ones (Foresti et al.) 27

Radiolytic grafting,
electrochemical behaviour of transparent heavily doped SnO_2 electrodes. Effect of ——— of iridium nanoaggregates (Bruneaux et al.) 375
Reversible waves,
potential step chronocoulometric procedure for the conversion of quasi-reversible waves into reversible ones (Foresti et al.) 27
Ruthenium oxide,
photoelectrochemical oxidation of water at CdS and CdSe anodes coated with composites of conducting polymer containing ——— (Gningue et al.) 337

Semiconductor,
anodic stabilization and decomposition mechanisms in ——— (photo)-electrochemistry (Gomes et al.) 237
Semiconductor electrode,
charge-transfer kinetics at an indium phosphide ———. Hole injection process in the presence of the Ce^{4+}/Ce^{3+} couple (Etcheberry et al.) 351
Semiconductor electrodes,
——— modified by electrodeposition of discontinuous metal films. Part I. Role of the film morphology (Allongue, Souteyrand) 361
Semiconductors,
critical analysis of electrical contacts to layered ——— for use in (photo)electrochemical studies (Etman, Neumann-Spallart) 411
Silicon,
in-situ infrared vibrational study of the early stages of ——— oxidation at the interface with a non-aqueous electrolyte (Ozanam, Chazalviel) 251
Silver,
double layer on ——— single crystal electrodes in contact with electrolytes having anions which are slightly specifically adsorbed. Part-III. The (111) face (Valette) 191
Sulphuric acid,
comparative voltammetric behaviour of H- and O-atoms on a Pt electrode in ——— solutions within the 293 K to 233 K range (Florit et al.) 209

Tetraphenylporphinatozinc,
influence of anion coordination on potentials for oxidation of the porphyrin ring in ——— (Hinman, Pavelich) 53
Thin films,
Semiconducting $CdSe_xTe_{1-x}$ ——— prepared by electrodeposition (Loizos et al.) 399
Tin,
catalysis by ad-atoms. Part II. Enhancement of CO oxidation on Pt catalysts modified by ——— ad-atoms in the gaseous phase (Shibata, Furuya) 217
Tin oxide,
catalytic effect of heavy metal ions on the ———/aqueous polyiodide interface and its application to photoelectrochemical cells (Tenne et al.) 289
Electrochemical behaviour of transparent heavily doped ——— electrodes. Effect of radiolytic grafting of iridium nanoaggregates (Bruneaux et al.) 375

Water electrolysis,
$H_2 + O_2$ recombination in non-isothermal, non-adiabatic electrochemical calorimetry of ——— in an undivided cell (Cunnane et al.) 163

Zirconia,
open-circuit potentials of ZrO_2 electrodes (Ardizzone, Radaelli) 461
